

State of Utah

JON M. HUNTSMAN, JR.  
Governor

GARY R. HERBERT  
Lieutenant Governor

## Department of Agriculture and Food

LEONARD M. BLACKHAM  
Commissioner

### **OFFICIAL NOTICE**

**Your Fruit trees, Grapes, Raspberries, Vegetable garden, etc, are scheduled for treatment.**

**The insecticide Carbaryl 4L, containing the active ingredient carbaryl, will be applied to above ground leafy foliage of edible food crops for control of Japanese beetle adults. Please be sure to follow all the Before and After treatment steps.**

**Application Date:** \_\_\_\_\_ **Approximate Time:** MORNING AFTERNOON  
**Applicator:** TruGreen Chemlawn

There will be two food crop treatments scheduled about 7 – 10 days apart. (\*Please see exception below for Apples and Pears). You will receive advance notice for the second treatment 48 – 72 hours prior to the planned application.

**\*Apples and pears will require the second foliar treatment no earlier than 14 days from the first treatment date. You will be notified 48 – 72 hours prior to the planned application.**

Fruit trees, grapes, cane berries, etc. requiring treatment will be marked prior to spraying with brightly colored plastic tape. Please leave this tape marker in place until August 1, 2008 to ensure proper spray applications.

You do not have to be present during the treatment as long as the applicators have access to your property, including the backyard, and you have made arrangements for all family members, including pets, to be out of the yard until reentry is possible.

#### **Before Treatment**

**Close all windows** and turn off or adjust your window air conditioning unit so that it does not draw in outside air during the Carbaryl 4L application. Cover if you desire.

**Move or cover cars, etc. from under trees to keep clear of any overspray.** If you choose to cover these items, use an inexpensive, disposable plastic painting drop cloth. Carefully dispose of in garbage can. Do not reuse. Exposed items should be rinsed following application.

Please move any barbecues, lawn furniture, trampolines, toys and other miscellaneous items away from your trees and shrubs. Cover large or stationary items. **Exposed items should be washed or rinsed after spray treatment.**

Water garden area thoroughly the night before treatment is scheduled. **Do not water for 24 to 48 hours after spray.**

Remove pet food and water dishes.

Thoroughly and securely cover any water feature that contains fish or other aquatic animals.

**Keep family members and pets indoors during the application on your property and until the After Treatment steps have been completed.**

#### **After Treatment**

**Wait until the foliage has dried before allowing family and pets to use your yard.**

Carefully dispose of any tarp material. Encourage careful hand washing.

**Do not water** over the treated area (foliage) for 24 to 48 hours to prevent washing the chemical off the crop(s).

Avoid contact with the wet Carbaryl 4L mixture on you skin and eyes. If skin contact is made, rinse thoroughly for 15 - 20 minutes. If the material should get into your eyes, flush gently with water for 15 to 20 minutes. Remove contact lenses if present after the first 5 minutes. Call your doctor or call the poison control center (1-800-222-1222) for further information.

For further information, please call (801) 538-7100 or (801) 538-4912 or visit <http://ag.utah.gov>.
